Agenda Presentasi

- 01 Business Understanding**
Latar belakang, konteks bisnis, dan tujuan analisis
- 02 Data Understanding**
Deskripsi dataset, atribut, dan proses data cleaning
- 03 Pertanyaan Analisis**
5 pertanyaan yang dijawab melalui data
- 04 Hasil Analisis & Visualisasi**
Temuan utama dari setiap pertanyaan
- 05 Kesimpulan & Rekomendasi**
Insight bisnis dan rekomendasi strategi

01

Business Understanding

Konteks Industri Musik Digital

Industri musik digital saat ini berkembang menjadi ekosistem berbasis data. Spotify menguasai lebih dari 30% pasar streaming musik global dengan lebih dari 600 juta pengguna aktif. Melalui fitur audio yang dimiliki setiap lagu, Spotify dapat menganalisis preferensi pendengar sehingga data tersebut dimanfaatkan oleh label musik maupun artis untuk menyusun strategi promosi yang lebih efektif.

Alasan Pemilihan Taylor Swift

Taylor Swift dipilih karena merupakan salah satu artis yang paling berpengaruh di Spotify. Pada tahun 2023, ia menjadi artis pertama yang berhasil menempatkan 5 album sekaligus dalam daftar 10 album dengan streaming terbanyak. Selain itu, katalog lagunya dari 2006–2024 mencakup berbagai genre sehingga sangat representatif untuk dianalisis.

Tujuan Analisis

Penelitian ini bertujuan untuk menganalisis pola popularitas lagu, melihat perubahan karakteristik audio dari waktu ke waktu, serta mengetahui apakah fitur audio memiliki hubungan terhadap tingkat popularitas lagu di Spotify.

Data Cleaning

Tidak ditemukan missing values maupun data duplikat. Kolom yang tidak relevan dihapus, release_datedikonversi ke tipe Date, serta ditambahkan fitur baru seperti year, duration_min, mood_category, dan energy_category.

Atribut Dataset

Dataset memuat identitas lagu (name, album, release_date) serta fitur audio seperti popularity, danceability, energy, valence, acousticness, tempo, loudness, dan duration_ms.

03

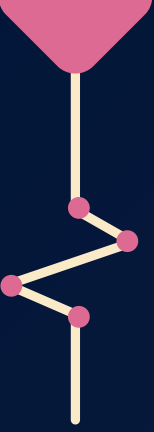

Pertanyaan Analisis

Deskriptif (Apa yang terjadi?)

Lagu apa saja yang masuk ke dalam kategori 10 lagu Taylor Swift paling populer dan bagaimana tingkat popularitasnya?

Diagnostik (Mengapa itu terjadi?)

- Apakah lagu dengan tingkat energy yang tinggi selalu berbanding lurus dengan popularitas yang lebih tinggi?
- Apakah terdapat perbedaan signifikan dalam profil audio antara lagu yang dikategorikan sebagai Hits (>70) dan lagu Niche (<40)?

03

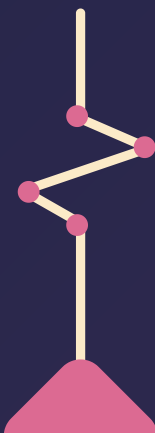

Pertanyaan Analisis

Tren (Bagaimana perubahannya
dari waktu ke waktu?)

Bagaimana perubahan tren valence
(tingkat kebahagiaan/nuansa musik)
dalam karya Taylor Swift dari tahun
2006 hingga 2024?

Prediktif (Tebakan berdasar data)

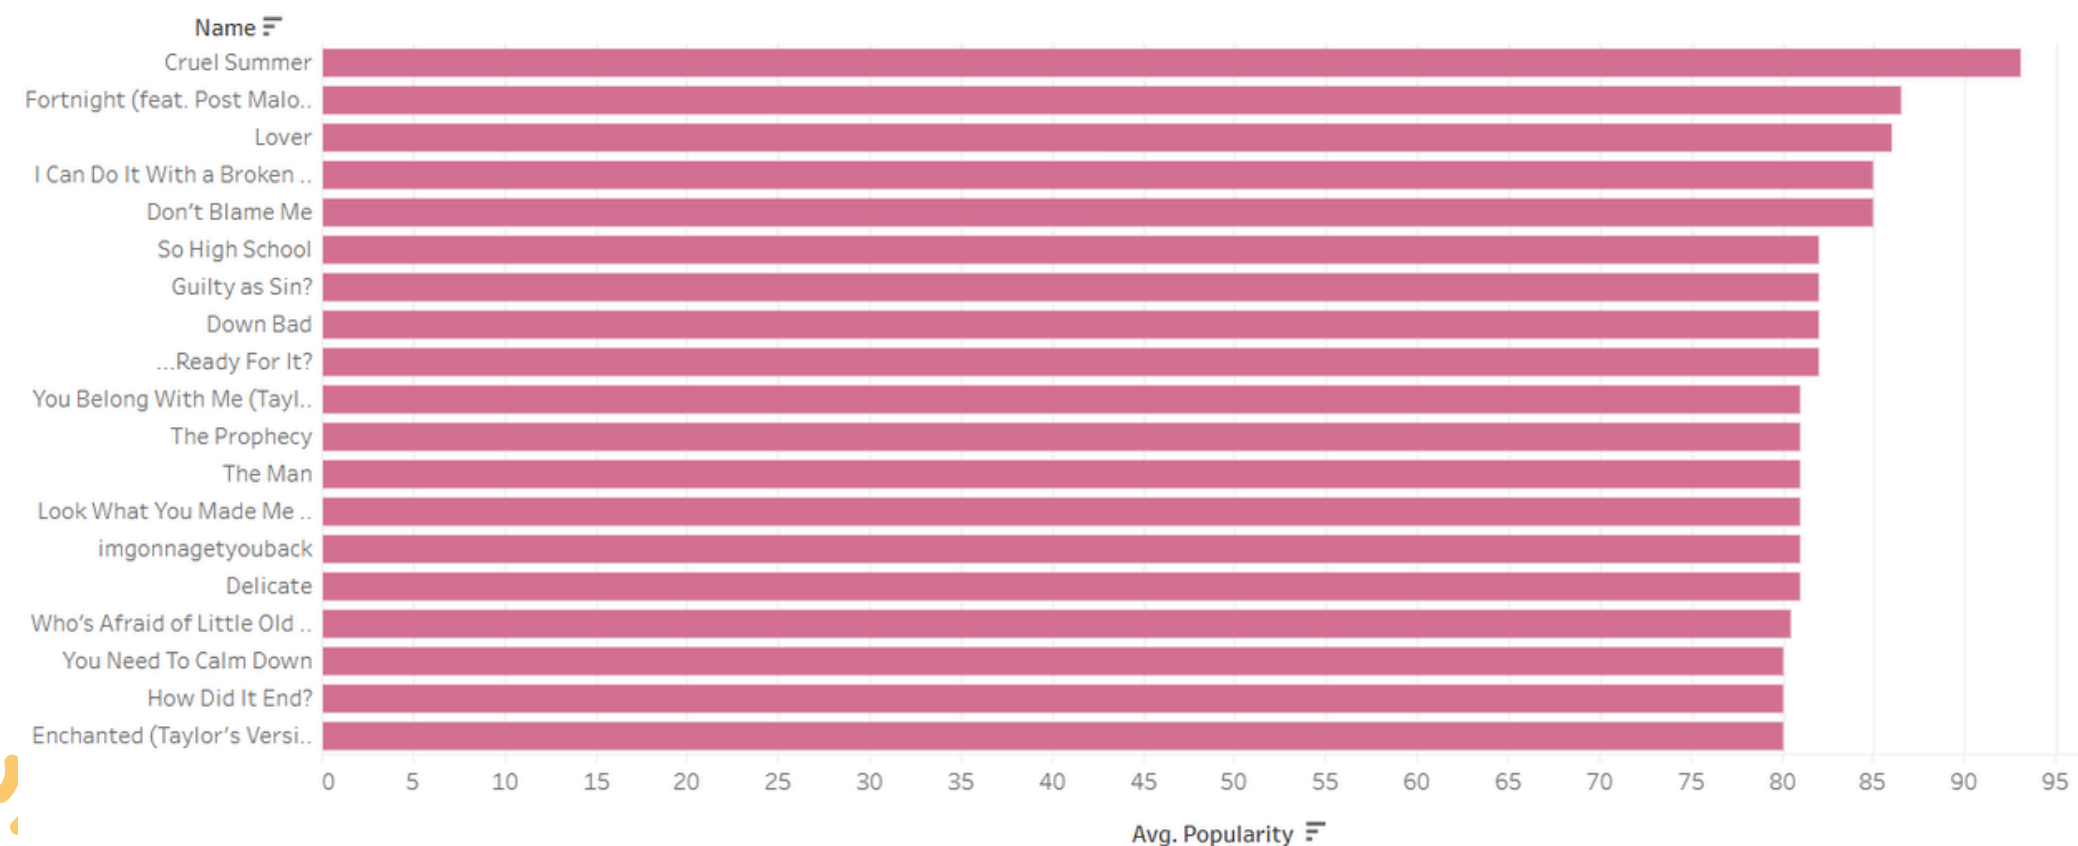

Fitur audio apa yang memiliki pengaruh
paling dominan terhadap popularitas
berdasarkan analisis korelasi?

Deskriptif (Apa yang terjadi?)

Lagu apa saja yang masuk ke dalam kategori 10 lagu Taylor Swift paling populer dan bagaimana tingkat popularitasnya?

10 Lagu Taylor Swift Paling Populer

Berdasarkan Grafik batang menunjukkan sepuluh lagu Taylor Swift dengan skor popularitas tertinggi di Spotify hasil analisis, Cruel Summer merupakan lagu paling populer dengan skor 93, diikuti Fortnight (91), I Can Do It With a Broken Heart (88), Lover (86), Anti-Hero (85), Don't Blame Me (85), august (84), cardigan (84), ...Ready For It? (82), dan Guilty as Sin? (82).

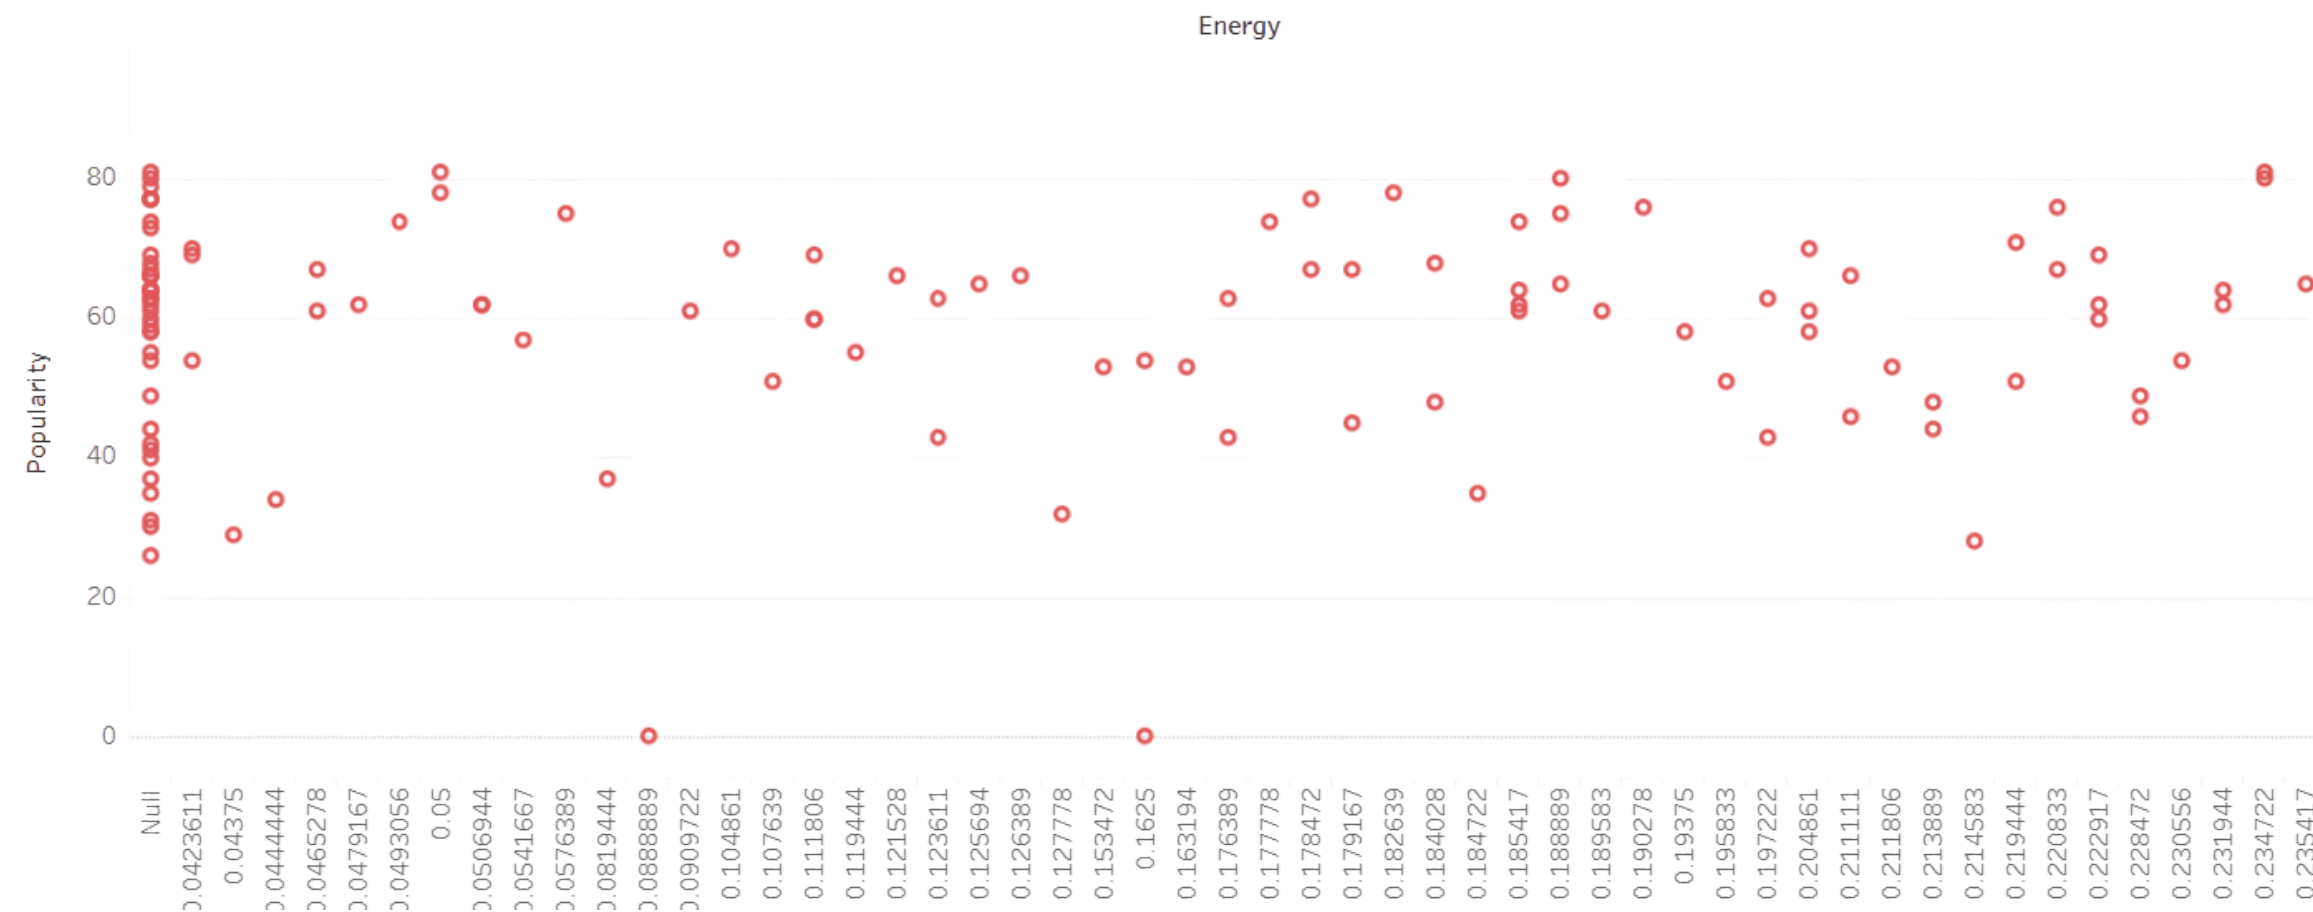

Hasil ini menunjukkan bahwa lagu-lagu dari era terbaru masih mendominasi popularitas, meskipun Cruel Summer dari album Lover memperoleh popularitas tinggi berkat efek viral di TikTok dan The Eras Tour.

Diagnostik (Mengapa itu terjadi?)

Apakah lagu dengan tingkat energy yang tinggi selalu berbanding lurus dengan popularitas yang lebih tinggi?

Energy vs Popularity

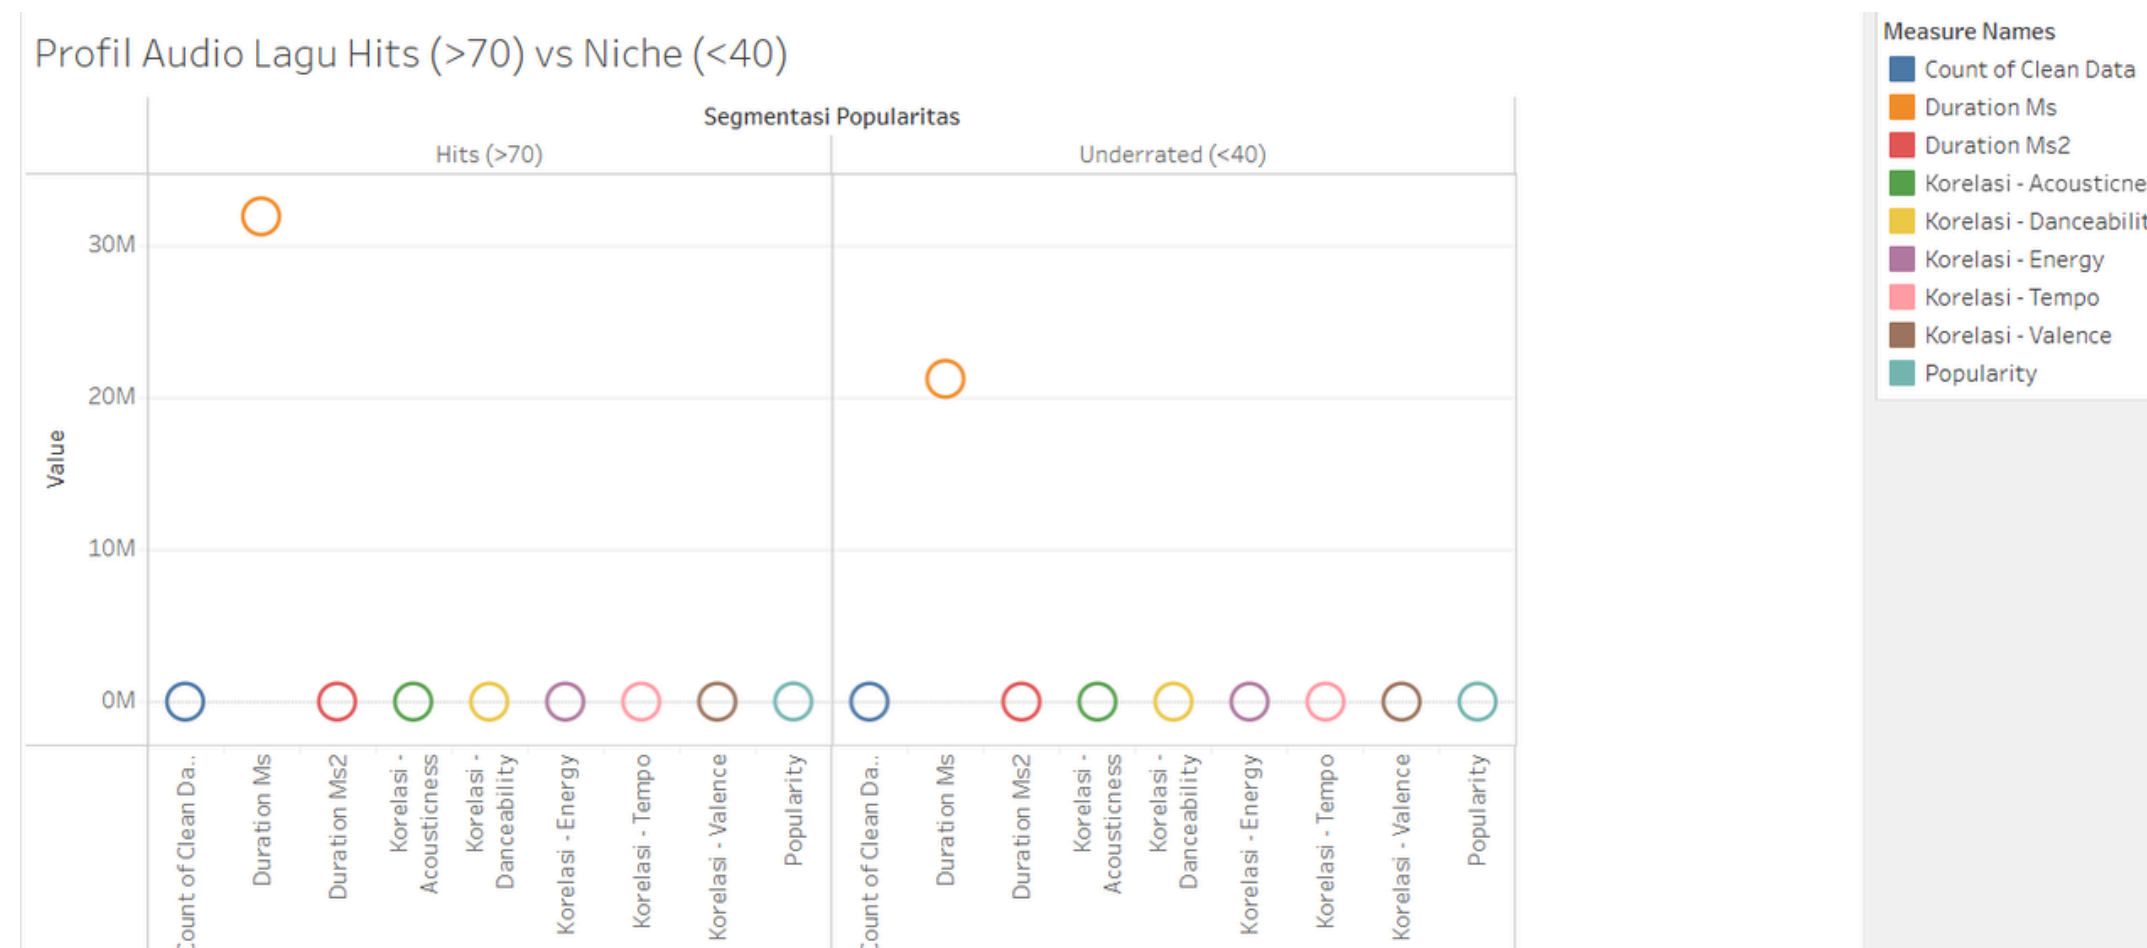

Scatter plot memperlihatkan hubungan antara nilai energy dan popularity setiap lagu. Titik-titik data tersebar tanpa membentuk pola tertentu sehingga tidak menunjukkan hubungan yang kuat. Bahkan, lagu dengan energy rendah memiliki rata-rata popularitas tertinggi, yaitu sekitar 59,59, sedangkan lagu dengan energy sedang memiliki rata-rata sekitar 55,76.

Hal ini menunjukkan bahwa lagu yang lebih tenang, akustik, dan emosional lebih diminati pendengar Spotify dibandingkan lagu dengan energy tinggi.

Diagnostik (Mengapa itu terjadi?)

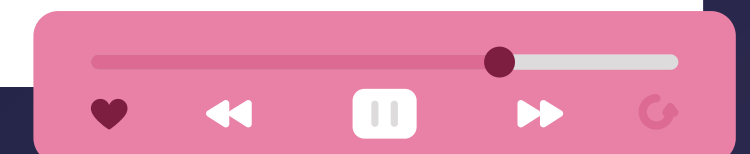

Apakah terdapat perbedaan signifikan dalam profil audio antara lagu yang dikategorikan sebagai Hits (>70) dan lagu Niche (<40)?

Grafik ini membandingkan karakteristik audio antara lagu yang memiliki popularitas tinggi dan lagu dengan popularitas rendah. Hasil analisis menunjukkan bahwa nilai rata-rata danceability, energy, valence, dan tempo pada kedua kelompok relatif serupa

Dengan demikian, tidak terdapat perbedaan karakteristik audio yang signifikan antara lagu populer dan lagu yang kurang populer.

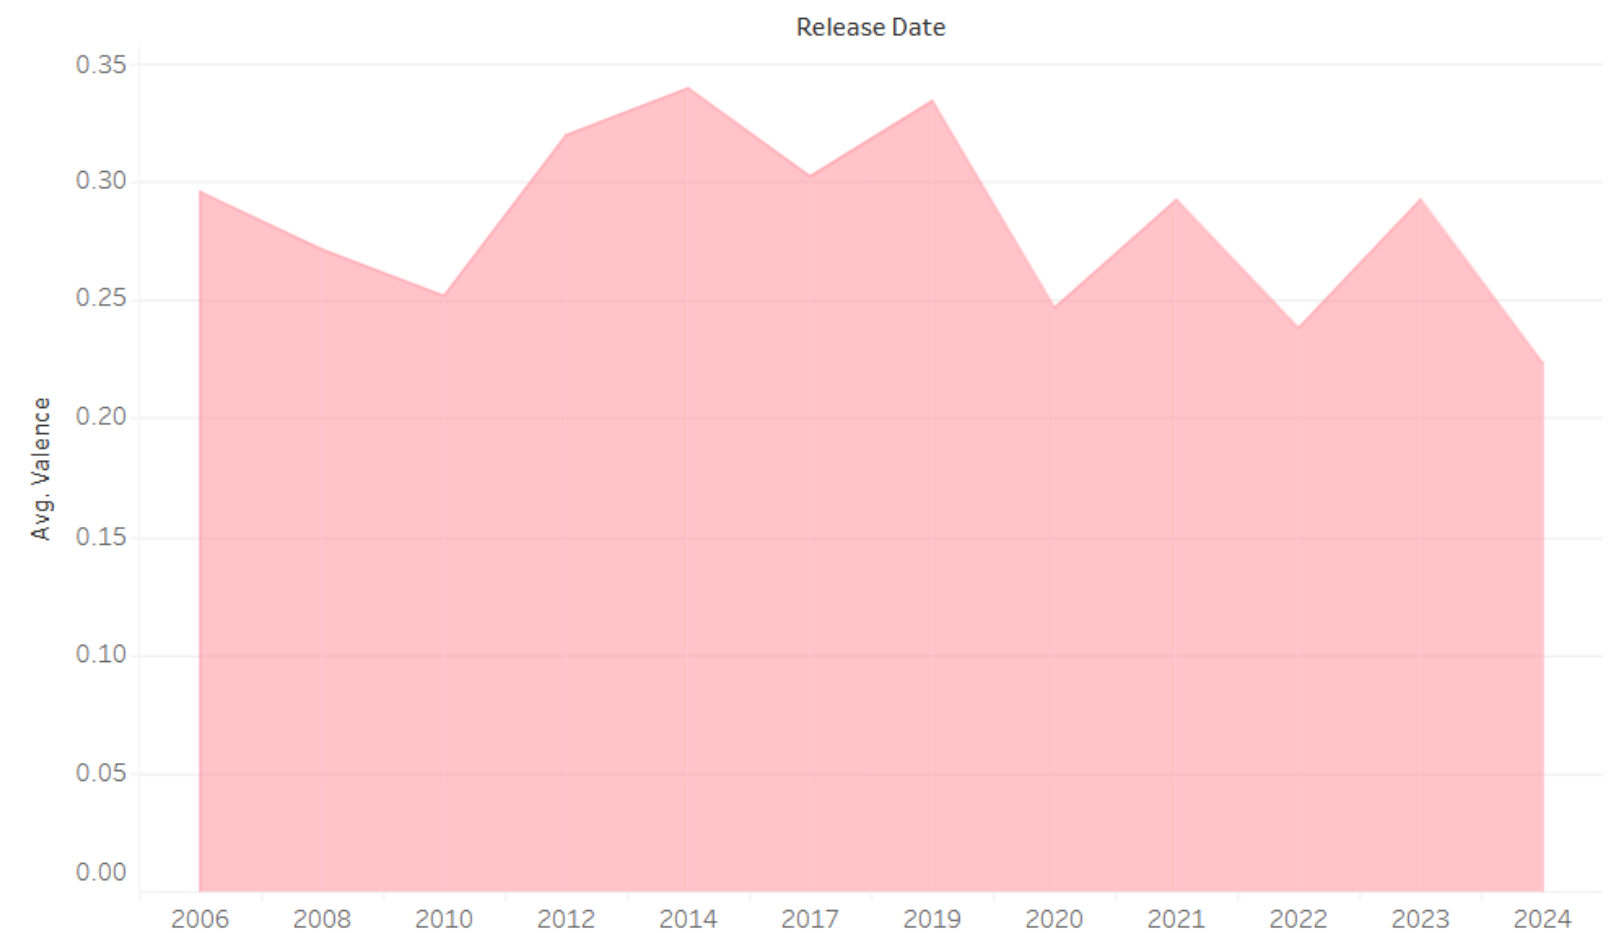

Hal ini mengindikasikan bahwa popularitas lagu tidak hanya dipengaruhi oleh fitur audio, tetapi juga oleh faktor lain seperti strategi promosi dan algoritma Spotify.

Tren (Bagaimana perubahan dari waktu ke waktu?)

Bagaimana perubahan tren valence (tingkat kebahagiaan/nuansa musik) dalam karya Taylor Swift dari tahun 2006 hingga 2024?

Tren Valence Seiring Waktu

Grafik area menunjukkan perubahan nilai valence dari tahun 2006 hingga 2024. Nilai tersebut mengalami fluktuasi, namun secara umum menunjukkan kecenderungan menurun. Titik terendah terjadi pada era *Midnights* dengan nilai sekitar 0,26, yang menggambarkan bahwa lagu-lagu Taylor Swift semakin bernuansa melankolis dan reflektif dibandingkan era awal kariernya.

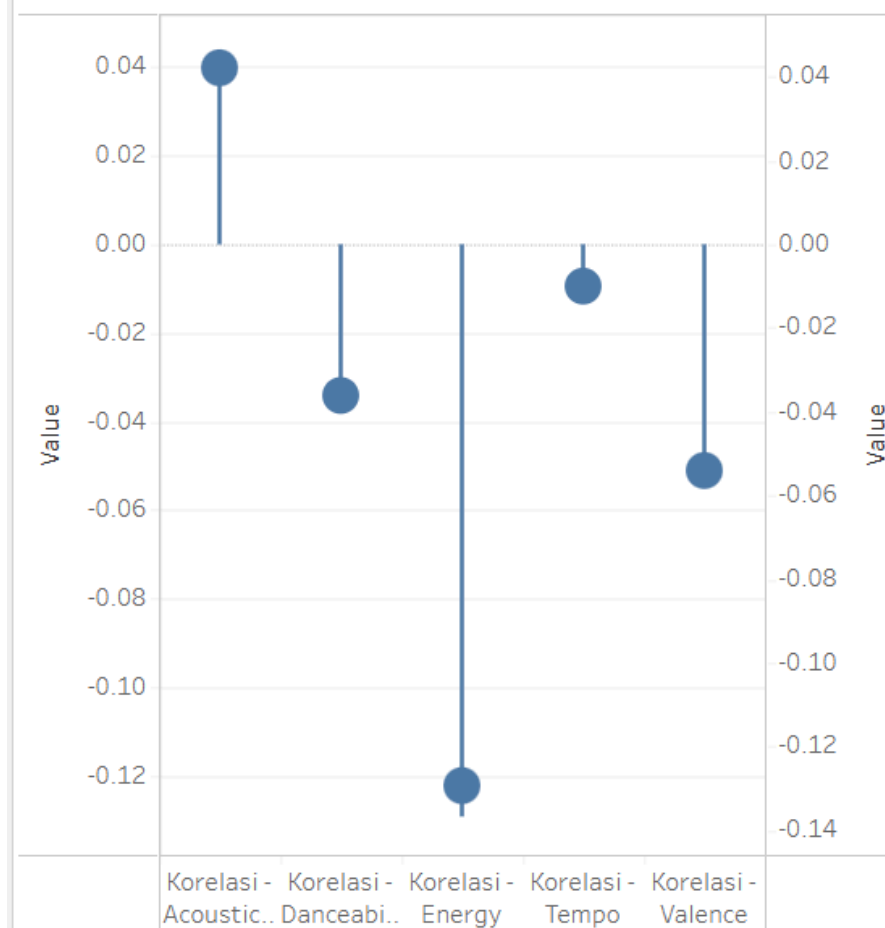

Perubahan ini sejalan dengan eksplorasi tema yang lebih dewasa pada album *folklore*, *evermore*, dan *Midnights* dari waktu ke waktu.

Prediktif (Tebakan berdasar data)

Fitur audio apa yang memiliki pengaruh paling dominan terhadap popularitas berdasarkan analisis korelasi?

Korelasi Fitur terhadap Popularitas

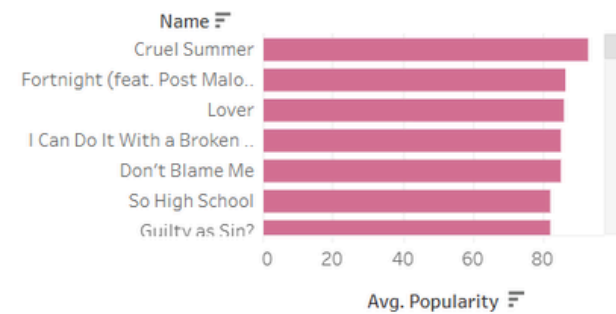

Grafik korelasi memperlihatkan hubungan antara beberapa fitur audio dengan tingkat popularitas lagu. Seluruh nilai korelasi berada di bawah 0,2, sehingga hubungannya tergolong lemah. Energy memiliki korelasi positif terbesar sebesar 0,1768, sedangkan Acousticness memiliki korelasi negatif terbesar sebesar -0,2187.

Dari hasil tersebut dapat disimpulkan bahwa popularitas lagu di Spotify tidak ditentukan oleh satu fitur audio tertentu, melainkan lebih dipengaruhi oleh faktor eksternal seperti waktu rilis, algoritma Spotify, playlist editorial, dan viral marketing di media sosial.

Korelasi Fitur terhadap Popularitas

Link Tableau Public

Kesimpulan

- Dataset terdiri dari 582 lagu dari 29 album Taylor Swift periode 2006–2024.
- Lagu paling populer adalah Cruel Summer dengan skor 93.
- Energy dan fitur audio lainnya memiliki hubungan yang lemah terhadap popularitas.
- Nilai valence menunjukkan tren yang semakin melankolis dari tahun ke tahun.
- Popularitas lagu lebih dipengaruhi oleh faktor non-audio seperti algoritma Spotify, strategi promosi, playlist, dan viral marketing.

Rekomendasi

- Memanfaatkan media sosial untuk meningkatkan viralitas lagu.
- Menentukan waktu rilis yang tepat agar memperoleh eksposur maksimal.
- Mengoptimalkan penempatan lagu pada playlist Spotify.
- Menggunakan analisis data audio sebagai pendukung, bukan satu-satunya dasar dalam strategi pemasaran.
